

System Requirements:

This interactive DVD has been designed for use on both Windows and Macintosh platforms (no installation required) with reference to the following specifications:

Windows Based PC:

- **Operating System:** Windows XP, Windows Vista or Windows 7
- **Processor Type:** AMD or Intel (Intel recommended)
- **Processor Speed:** Intel Core Duo 1.2 Ghz or better (2.6 Ghz or better recommended)
- **Processor Speed - Pentium:** 3.2 Ghz or better
- **RAM:** minimum of 512 Mb (1 Gb recommended)
- **Display:** minimum screen size or 1024 x 768

Macintosh:

- **Operating System:** Mac OS 10.4.x or better
- **Processor Type:** Intel Solo or Intel Core 2 Duo (Intel Core 2 Duo recommended)
- **Processor Speed:** 1.0 Ghz or better (1.8 Ghz or better recommended)
- **RAM:** minimum of 512 Mb (1 Gb recommended)
- **Display:** minimum screen size or 1024 x 768

Starting BOBOSC

Windows Start-up:

Once the interactive DVD is inserted, a start-up screen should load automatically. If it does not load automatically, go to “My Computer” or “Computer”, select your DVD drive and then select the “BOBOSC” application to start the program.

Macintosh Start-up:

Once the interactive DVD is inserted, the disc will mount automatically on the desktop, select the “BOBOSC” application to start the program.

Screen Resolution:

Playback at Full Screen

To ensure the best possible experience with viewing the resource, we recommend setting your screen resolution to 1024 x 768. Please use the instructions below to assist you.

Windows XP:

Right Click the Desktop, and select **Properties**. In the **Display Properties** window, select the **Settings** tab in the top-right. Drag the **Screen Resolution** slider to the left to decrease/increase the resolution of your monitor to 1024 x 768. Once done, press **Apply**.

You will be prompted to accept the new resolution, select the **Yes** button.

Windows Vista:

Right Click the **Desktop**, and select **Personalize**. Once the screen loads click **Display Settings**. Drag the **Screen Resolution** slider to the left to decrease/increase the resolution of your monitor to 1024 x 768. Once done, press **Apply**. You will be prompted to accept the new resolution, select the **Yes** button.

Windows 7:

Right Click the **Desktop**, and select **Screen Resolution**. Select the **Resolution** dropdown box, and drag the slider to **1024 x 768**.

Once done, press **Apply**. You will be prompted to accept the new resolution, select the **Keep Changes** button.

Mac OS X 10.5+:

Click Apple logo in top-right of screen, select **System Preferences**.

Once System Preferences are loaded, click on **Displays**.

Select the **1024 x 768** option from the list provided. The change in screen size automatically gets applied. Close the window once completed.
